DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/6/2007 has been entered. Claims 128-148 are pending.

Information Disclosure Statement

2. The information disclosure statement (IDS), submitted on 3/6/2007, has been considered by the examiner. The examiner notes that the PCT search report for PCT/US04/00741 cites references in the "X" and "Y" category. These references have been reviewed, but are not found to teach all the limitations of the presently claimed invention.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The examiner's amendment was necessary in order to update the status of the continuing data.

The application has been amended as follows:

In the specification:

The first paragraph on page 1 of the specification (which was amended in the preliminary amendment filed on 7/3/2003):

Line 2, --, now Patent No. 7,028,904,-- has been inserted after "2003".

Line 3: --, now Patent No. 6,595,420-- has been inserted between "1999" and ":",

Allowable Subject Matter

4. Claims 128-148 have been allowed over the prior art of record.
5. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest a wireless automatically-activated code symbol reading system wherein said device controller is programmed to automatically detect when said wireless hand-supportable code symbol reader is located inside of said predetermined RF communication range based on measuring the strength of said detected reference signal and thereupon to automatically transmit to said first RF-based transceiver the symbol character data string produced at substantially the same time when said data transmission control activation signal is generated while said wireless hand-supportable code symbol reader is located inside of

said predetermined RF communication range; in combination with the other limitations as recited in claim 128.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jared J. Fureman whose telephone number is (571) 272-2391. The examiner can normally be reached on 8:00 am - 5:30 PM M-T, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
